Digital manometer

With integrated bar graph display

Accuracy 0.5 %

Description

This digital manometer 3321 is the ideal solution for local digital display independent of the mains. The integrated battery allows measurements to be made independent of a fixed source of power.

Accuracy, reliability and mechanical resilience make the digital manometer suitable pressure measurement tasks in numerous applications.

The stepped measuring ranges extend from 2 bar up to the high pressure range of 700 bar. For pressure ranges above 50 bar, the casing and parts that come into contact with the measuring medium are made of stainless steel and thus resistant to attack from chemically aggressive media.

The additional integrated bar graph display with a trailing pointer function shows the trend in current working pressure directly. The model 3322 comprises a further 4,5-digit display for a direct readout of peak value, tare and other parameters. Internal lighting ensures the display is optimally for a clear readout even in unfavourable lighting conditions.

The buttons on the front are used for adjustment of the programmable parameters.

The digital manometer meets electromagnetic compatibility requirements (EMC) to EN 61326.

Features

- Measuring ranges from 2 700 bar
- Fine step selection of nominal pressure ranges
- LC-Display with numerals 11 mm high
- Bar graph display with a trailing pointer function
- Tare function
- · Password protection
- MIN/MAX memory
- Internal lighting
- · High overload protection

Measuring ranges

Overpressure Positive 0...2 bar up to 0...700 bar

Area of use

Machine construction
Plant and apparatus construction
Hydraulics, pneumatics
Measuring equipment monitoring

08/11 Model: 3321, 3322
